EDUCATION

Northeastern University

Boston, MA

B.S. Computer Science and Business Administration, expected May 2028 | GPA: 3.8/4.0

Sep 2025 – May 2028

Relevant Coursework: Programming in C++, Financial Management, Profit Analysis for Managers and Advisors, Financial Accounting, Intro to Marketing, Intro to Databases, Program Design & Implementation I (Python), Program Design & Implementation II (Java/OOD)

WORK

Munich Re

Princeton, NJ

Data Engineer Intern

May 2026 – Aug 2026

- Provisioned Databricks Genie Space instances across business units to enable natural-language queries against the enterprise Data Lakehouse
- Built a production Python logging package routing structured logs to Azure Application Insights and Databricks Delta tables, published via JFrog Artifactory for company-wide use. Adopted by 12% of new internal python projects, improving observability for data pipelines
- Prototyped an OpenCode fork as a coding-agent integrated with a trusted LLM gateway. Used by team in demo to management evaluating ways to improve internal developer workflows

Northeastern Disrupt

Boston, MA

Quant Team

Jan 2026 – Present

- Implemented and backtested statistical-arbitrage models in Python using cointegration analysis to identify mean-reverting spreads (e.g., PM vs BTI)
- Researched and simulated derivatives strategies (IV–RV arbitrage via credit spreads) in a paper-trading portfolio with a team of analysts

NUImpact - Northeastern's student-run impact VC fund; \$600k AUM

Boston, MA

Rotational Associate

Jan 2026 – Present

- Sourced and conducted diligence on early-stage ventures and prepared outreach materials for prospective donors and partners
- Created a web scraping tool for automated data capture from various VC firm reports to provide context for AI-driven slide deck and pitch production

Oasis at Northeastern

Boston, MA

Software Developer

Jan 2026 – Apr 2026

- Architected backend and REST APIs for a study-abroad review platform (Node.js, MongoDB); implemented user authentication, search, and review endpoints for a 5-person team

Starbucks

Ellington, CT

Barista

Oct 2024 – Aug 2025

- Customer-facing role in a high-volume environment; handled POS, drive-thru operations, and rapid issue resolution

PROJECTS

Agentic Financial Document RAG | Python, LangChain, HuggingFace, ChromaDB

Dec 2025 – Present

- Built an agentic RAG system for financial documents with function-calling and multi-step reasoning to route queries and analyze retrieved data
- Designed a ChromaDB + HuggingFace-embeddings vector store for fast chunk retrieval and implemented strict retrieval guardrails to prevent LLM hallucinations

PROGRAMMING SKILLS

Programming Languages: C++, Java, Python, SQL, JavaScript, TypeScript, HTML/CSS

Frameworks & Libraries: React, Next.js, Node.js, Django, Pandas, NumPy, Matplotlib, yfinance, HuggingFace, LangChain, ChromaDB, Apache Spark

Cloud & Data Platforms: Azure, Databricks, Power BI

Developer Tools & DevOps: Git, GitHub, Docker, Azure DevOps, VS Code, PyCharm, IntelliJ, DataGrip

Certifications & Tests: FINRA Securities Industry Essentials (SIE)
